Invitation to Edinburgh for ASSW 2024

On behalf of the Local Organising Committee we are delighted to invite you to the Arctic Science Summit Week 2024 (ASSW 2024), including the Arctic Observing Summit, which will take place in the historic city of Edinburgh (Scotland, UK) from 21-29 March 2024.

The ASSWs have been organised annually since 1999 by the [International Arctic Science Committee \(IASC\)](#) to provide opportunities for coordination, cooperation and collaboration between the various scientific organisations, projects and others involved in Arctic research. The **ASSW 2024** is being organised by a strong team of local partners; led by the Scottish Arctic Network; University of Edinburgh; IASC, Scottish Government; Scottish Alliance for Geosciences Environment and Society; Marine Alliance for Science and Technology for Scotland; UK Polar Network; and the NERC Arctic Office.

The venue will be **The University of Edinburgh**, one of the world's best universities in one of the world's greatest cities. Whilst we hope you can join us in beautiful Edinburgh, the conference is also planned as a hybrid event.

The Call for business and community meetings is now open. We look forward to receiving your proposals and we can't wait to welcome you to Edinburgh next year.

Henry Burgess, IASC President, Head of NERC Arctic Office, Chair of Local Organising Committee
